

Upholstery Colours

The following colours of high quality synthetic leather are available for the upholstery of our products. The synthetic leathers we use are characterized by their tensile strength, durability, longevity and easy cleaning and resistance to disinfectants. We use a colour selection of synthetic leathers VOWAled Pisa (Vowalon) and MEDISTAT (Cotting/Griffine).

white - 003330	birch - 003332	yellow - 003335	tangerine - 008920	rosewood - 008921	
red - 003345	dark pink - 003341	magenta - 003342	light blue - 008567	baltic - 006466	
atoll - 003600	blue - 003348	ice - 003336	turquoise - 003337	green - 003339	
violet - 003316	light grey - 003331	grey - 003333	anthracite - 004021	coffee brown - 003346	
black - 003349	black elec. conductive/antist.	atic Note: For technical re	Note: For technical reasons, slight variations in upholstery colours are possible.		

The synthetic leather should be cleaned with a soft brush and a mild soap solution (diluted commercial dishwashing liquid - no organic solvents). After cleaning, always rinse with clear water and dry with a soft cloth.

We also offer the option of having the upholstery done in other colours or brands of synthetic leather. The corresponding materials should be sent to us, subject to prior arrangement.

The black electrically conductive synthetic leather upholstery (with earth contact on the frame) is available at extra charge. It is, however, already included in the price of the operation and multi-function tables.
